

Implementation

Cohort 1, Team 4:

Robert Watts
Adam Wiegand
Josh Hall
Travis Gaffney
Xiaoyu Zou
Bogdan Lescinski

Unimplemented requirements (full details on each requirement can be found in the Req1.pdf file):

FR_OPER_ABILITY and thus UR_OPERATIVE_ABILITIES (as FR_OPER_ABILITY fulfilled it) are not implemented. They would have been implemented in the Operative class as shown in the concrete representation, implementing them would be reasonably easy (but still time consuming). They weren't implemented as we ran out of time (due to time spent fixing bugs instead which resulted in a more polished finished product).
